

## ALL-PAYER CLAIMS DATABASES

The federal government is poised to grant dollars to states to improve or implement an APCD. States will need a partner with direct experience in planning, solution design, governance, and implementation of APCD solutions across multiple states.

**23+**  
**YEARS**

**of valued enterprise-wide partnership with state healthcare agencies across the country**

## CORE COMPETENCIES

### Strategic and Sustainability Planning

We've helped our clients secure **over \$1 billion** in federal funding to implement health IT solutions.

### Federal Funding Requests

Our team has written **100+ RFPs** for a variety of state clients and systems, including APCDs.

### Project Management

Our **PMP®-certified** project managers are versed in state, federal, and APCD policy and data requirements.

### Change Management

## Stakeholder Assessment & Engagement

- ▶ Engage key stakeholders to outline federal APCD guidance and drive participation
- ▶ Determine state-specific use cases and benefits from the APCD
- ▶ Align with federal policy and develop state-specific APCD requirements
- ▶ Utilize our established relationships with state agencies, payers, hospital associations, and HIEs to ensure key data submission needs are understood and reliably submitted
- ▶ Make recommendations on services offered as part of APCD efforts
- ▶ Develop policies and procedures for providers to submit
- ▶ Assess technology to determine needs to support APCD efforts (e.g., public web portal)

Our goal is **performance**. Our passion is **people**. Our team is **Briljent**.

## Data Governance Development

- ▶ Manage data submission policies and requirements based on federal APCD policy and state-specific needs
- ▶ Develop a data dictionary for the consolidated data sets
- ▶ Track submissions and identify non-compliant data
- ▶ Apply our expertise in clinical and claims data standards
- ▶ Design state-specific data consolidation requirements and best practices for data normalization to support data queries
- ▶ Establish committees for review of data release and data submission
- ▶ Engage our skills in MPI/data quality management

## Training, Adoption, and Communication

- ▶ Create a test plan
- ▶ Develop a detailed training plan
  - Communication plan
  - Updated business processes
  - New database platform
- ▶ Develop a data submission manual and train users on data submission processes
- ▶ Establish usability metrics baseline and track overall usage and system adoption

# We are Briljent.

Our team includes **former state staff** who have considerable experience with APCD implementation. We're eager to share our lessons learned and best practices to help states avoid familiar challenges when considering or planning APCD improvements or new implementations.
